

001 Quality policy

14.12.2023

Approved by the Axactor Board

Quality is an integral part of Axactor's business, and imperative to achieving our vision to do it better and become the industry benchmark. Our customers and investors should experience that we deliver on what we promise, consistent with how we say we intend to do so, and always in a sustainable manner with a view to continuous improvement. We achieve this by committing our management and our employees to satisfy the requirements of our quality management system, which is detailed in our regularly reviewed board approved policies, and operational procedures.
